CAPABILITY STATEMENT

4D Systems is an A3 certified robotic integrator and specializes in the creation of custom robotic work cells. With multiple layouts and solutions for many applications such as spot welding, material handling, sealing, painting, cutting, and thermal processing, manufacturers can work with 4D Systems engineers to design the perfect work cell for their production needs.

4D Systems has many years of robotic experience and we have developed applications through R&D when none have existed; we believe there are no robotic systems that we cannot work with. We work with our customers to provide innovative solutions to allow them to increase their efficiency which in-turn improves productivity and profitability while giving them a competitive edge within the market.

4D Systems is a world leading provider of software, hardware and professional services for the engineering community. 4D Systems is a Solutions Partner/Reseller of Siemens and Dassault Systems software products.

4D Systems enables its customers to improve their competitiveness, productivity and profitability by delivering and maintaining value added world-class process, workflow, asset management and Product Lifecycle Management (PLM) solutions.

NAICS CODES

*NAICS list is not all inclusive.

325510: Paint and Coating Manufacturing
327910: Abrasive Product Manufacturing
332813: Electroplating, Plating, Polishing, Anodizing, and Coloring
333248: All Other Industrial Machinery Manufacturing
333310: Commercial & Service Industry Machinery Manufacturing
333992: Welding and Soldering Equipment Manufacturing
333998: All Other Miscellaneous General Purpose Machinery Manufacturing
513210: Software Publishers
811210: Electronic & Precision Equipment Repair & Maintenance
811310: Commercial & Industrial Machinery & Equipment Repair & Maintenance
